Cohort-wide signals

03

Program implications

This sample cohort shows strong alignment toward careers that combine communication, structure, and service. The concentration in instructional and technical pathways suggests participants are drawn to roles where they can apply practical skills in a structured environment. The high team orientation score indicates that collaborative programming and peer learning formats may be particularly effective for this group. Program staff can use this type of insight to guide workshops, pathway support, and employer engagement.

04

Suggested actions

Workshop	Run an instructional pathway workshop for participants aligned to training and education roles.
Employer outreach	Engage technical employers - 53% of participants show readiness for hands-on roles.
Programming	Design collaborative sessions that leverage the group's strong team orientation score.
Support	Add structured check-ins for participants with lower ambiguity tolerance (42%).

05

Individual participant snapshot

Participant A Applied pathway: Instructional / Training Strong match		
READINESS Early-stage ready Strong foundation with a clear path to full role ownership.	RECOMMENDATION Move forward Prioritize structured 30-day onboarding with explicit ownership boundaries.	RISK TO MONITOR Needs clarity Best in stable environments with explicit role direction.
